

USB 3 Gigabit Adapter

- Add Gigabit to your USB 3 Mac
- Quickly and easily share large files over the network
- Hot swappable, plug and play

The Kanex USB 3 Gigabit Ethernet Adapter adds a Gigabit Ethernet port to your MacBook Air, MacBook Pro with Retina display or any other USB 3 enabled computer. Ideal for hotel rooms or conference rooms with a wired internet connection, this small and compact adapter connects to a USB 3 port on your computer and provides an RJ-45 port for connection to the internet or local area network for sharing and accessing files at data transfer rates of up to 1 Gbps.

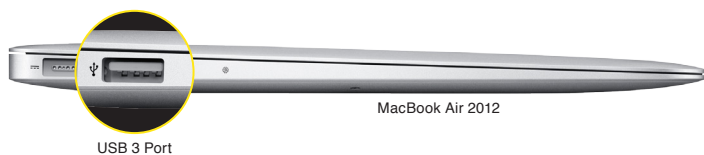

Quick and Easy

Set-up is easy. After a one-time software installation, simply connect an Ethernet cable to the Kanex USB 3 Gigabit Adapter then plug into the USB 3 port of your MacBook Air or MacBook Pro with Retina display. Now you're connected to the network or the Internet!

Travel

Perfect for business or travel where Wi-Fi is limited such as hotels or conference rooms. This compact adapter is ready to go when you are. The Kanex USB 3 Gigabit Adapter is bus powered through USB, therefore no external power is required.

Versatility

This versatile little adapter is also backwards compatible with USB 2.0 and USB 1.1 so you'll be ready for an upgrade when your computer is.

Technical Specifications:

- Compatible with USB 3, USB 2.0, USB 1.1 specifications
- Supports Wake-on-LAN
- Requires driver installation
