

AirBlue™

Bluetooth® to your Speakers

- Wirelessly stream music from your Bluetooth® enabled device
- Connect to any speakers, AV receivers or Car Aux port
- Built-in rechargeable battery

Stream Audio Wirelessly

The Kanex AirBlue™ is a portable Bluetooth® based music receiver that enables you to wirelessly play, listen and control all your favorite music from your iPod Touch, iPhone, iPad or Android device through your home stereo speakers.

Small Footprint

Take the AirBlue™ anywhere you go and get set up in a snap. Sync and configure your Bluetooth® audio device in just minutes. It's flexible enough to stream to your any speakers, home entertainment center, or car sound system.

Rechargeable Battery

In case you're running out of juice, no cumbersome power supply is needed to charge the unit. Simply connect it to a USB power outlet and start streaming your favorite tunes. No access to a USB port to keep the AirBlue™ charged? That's okay because it averages 10 working hours, more than enough to keep you worry free.

Get the Kanex App.
Available on the App Store.
