

# iAdapt DVI Cable - 10 ft

Single Cable Solution For Mac to Monitor

- Mini DisplayPort to a DVI enabled monitor, projector or HDTV
- Perfect for displaying boardroom presentation
- Convenient length and compact in size

## Mini DisplayPort to a DVI Monitor

The Kanex Mini DisplayPort to DVI cable is a premium grade, one way active adapter cable designed to connect your Mini DisplayPort equipped Mac to single-link DVI-D based LCD monitor, projector or a computer monitor such as Dell, NEC, HP and much more. The Kanex Mini DisplayPort to DVI is a single cable solution that supports vivid colors and sharp resolution from your Mini DisplayPort output to a DVI display. Engineered with portability in mind, you can carry it virtually anywhere you go.

**10**ft

## Convenient Length

With 10 ft. (3m) length the iAdapt DVI cable provides the flexibility in extending your desktop content from anywhere - office, home or on the road. Connect any display or projector that uses DVI-D with this lengthy cable.

## Single cable solution

One cable means less clutter and fewer cables to connect to your device. High flexibility and low bend radius allows compact connectors to fit neatly under any constricted or tightly spaced areas.
