

iAdapt VGA Cable - 10 ft

Single Cable Solution For Mac to Projector

- Mini DisplayPort to a VGA enabled projector or monitor
- Perfect for displaying classroom & boardroom presentation
- Convenient length and compact in size

VGA Projector

Mini DisplayPort to a VGA Projector

The Kanex Mini DisplayPort to VGA cable is a premium grade cable engineered to connect your Mini DisplayPort equipped Mac to a VGA enabled display, projector or a computer monitor. It's the perfect single cable solution that supports sharp resolutions from your Mini DisplayPort output to VGA. This cable is designed with portability in mind. It's lightweight and easy to carry wherever you go.

Ideal for Schools & Universities

Maximize your performance in teaching by extending or mirroring your Mac desktop with ease and simplicity. This cable delivers crisp resolution with vivid colors.

10 ft

Convenient Length

With 10 ft. (3m) length the iAdapt VGA cable provides the flexibility in extending your desktop content from anywhere - home, office or on the road. Connect any display that uses VGA with this lengthy cable.

Single cable solution

One cable means less clutter and fewer cables to connect to your device. High flexibility and low bend radius allows compact connectors to fit neatly under any constricted or tightly spaced areas.
