

Access personal USB storage from your smartphone and tablet

- Convert your existing hard drive into a personal home network
- Offload photos and videos to free up space on your smartphone or tablet
- Securely organize your files using meDrive File Manager App

Works with iPhone, iPad, iPod Touch, Android Devices, Mac and PC

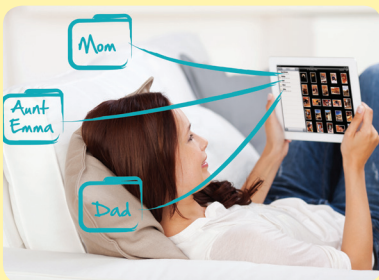

Put Your Hard Drive to Work

No need to buy a new expensive hard drive, simply connect meDrive to your existing USB hard drive to create centralized storage and a wireless network for your smartphone and tablet.

Share with the Family

Share and backup photos and videos with up to 5 mobile devices at the same time. View your content on any screen in the house.

File Manager App

Download the free meDrive App from App Store to manage your everyday documents like: PDF, JPG, MOV, Apple's Keynote, Pages, and Numbers.

Safe and Secure

meDrive is password protected and prevents unwanted guests from accessing your hard drive.

Easy Setup

With a built-in auto-discovery feature, meDrive can easily detect the devices on your network and get you connected right away.

Did You Know?

You can connect and collaborate seamlessly between iOS, OS X or Windows platforms. meDrive also works with other popular iOS and Android file management apps.
