MacBook

4K TV

The Kanex Ultra Slim HDMI 2.0 cable allows you to easily connect any HDMI enabled device to your HDMI TV or monitor.

## Cinema Quality at Home

Everything looks better with Kanex HDMI® Cables, simply connect to your HDTV and watch your favorite movies and TV shows from home. Our cables are HDMI® compliant to support 1080p and up to 4K resolutions.

## High Dynamic Range Support

While 4K is about adding more pixels, HDR is about creating better, more dynamic-looking pixels. It does that by boosting contrast and brightness, and providing a wider range of colors than you can get with current 1080p content and displays. Kanex HDMI cables fully support HDR!

## Premium Materials

Kanex HDMI® cables are made only with premium-quality materials. The TPE material provides flexibility and durability so it bends and folds easily - no matter where your HDTV is set up. The durable plastic housing was built for easy grip while the connectors plug in easily. Whether you're plugging in and out everyday or using it as a permanent hook-up, Kanex HDMI® cables offer reliability to your devices.

## One Cable, Endless Possibilities

Easily switch between your Apple TV, Xbox One, Playstation 4, or other HDMI® devices without the need to optimize your display settings. Audio Return Channel eliminates the need for a separate audio cable reducing clutter.

### WHAT'S INSIDE

Ultra Slim HDMI 2.0 Cable

### WARRANTY

1 Year Limited

### PRODUCT INFORMATION

MPN K173-1280-HD202M

UPC 815387022176
