USB 3.0
3-Port Hub
with Gigabit Ethernet

- Gigabit Ethernet adapter for a fast and secure wired connection
- Adds three SuperSpeed USB 3.0 ports for fast transfer speed
- Small compact design for easy travel

USB **3.0**   PLUG & PLAY

kanex

The Kanex USB 3.0 Hub and Gigabit Adapter is an all in one solution. The hub portion uses the latest SuperSpeed USB 3.0 standard for fast transfer speeds between devices and your computer. It has three extra USB 3.0 ports which enable users to connect more devices. The gigabit ethernet adapter adds a gigabit port to your MacBook Air, MacBook Pro with Retina display or any other USB 3.0 enabled computer and provides a fast and secure wired connection without hassle of Wi-Fi setup.

Travel Companion

The Kanex USB 3.0 Hub is a perfect travel companion for MacBook users. Its features help you expand, connect and increase productivity while on the road. The 3-port hub gives users the ability to connect 3 more USB 3.0 devices such as hard drives, digital cameras, MP3 players and more. The Gigabit adapter gives you the port you need to connect to a wired internet connection or to a network.

Plug & Play

No driver needed. Other USB 3.0 devices can also quickly connect to the Kanex 3-port Hub with a USB cable and because it's backward compatible, other USB 2.0 or 1.1 devices will also connect.

High-Speed

Using USB 3.0 gives users SuperSpeed transfer speeds of up to 5 gigabits per second so transferring files and media from devices to your computer is fast and simple. Also using a gigabit port provides 1000 Mpbs of transfer speed so you'll have the performance you'll need for connecting to the internet or to a network.

Did you know?

You can plug in a 5V wall power adapter to provide more power to the USB 3.0 ports. Up to 900mAh for each port.

Technical Specifications	MPN	UPC	Color	Packaging (W x H x L)
RJ-45 port that supports 10/100/1000BASE-T networks	USB3GBIT3X	814556015025	White/Gray	3.92 x 6.75 x 1.14 in.
