kanex

USB to Ethernet Adapter
Perfect for Macbook Air

- Plug & play your MacBook Air or other devices to the internet
- USB-bus powered
- Blazing fast 100Mbps performance

MacBook Air Compatible

Connect your MacBook Air or any other device to a wired network in just seconds with the Kanex USB Ethernet Adapter. Ultra-compact and lightweight, it attaches to the USB port of your MacBook Air and provides an instant Ethernet connection to your network. The adapter gets its power through the USB connection, so no power cord is necessary. Fully compatible with all prior versions of USB including USB 2.0.

Internet to Go

Perfect for business or travel where Wi-Fi would be limited. Just plug the USB port into your MacBook Air and connect to a network instantly!

USB-Bus Powered

The Kanex USB Ethernet adapter is bus powered through USB therefore no external power required.

Plug and play

Setup is easy! Plug the adapter into your USB port and install one-time software. The drivers are available on kanexlive.com/usbrj45-adapter.
